

10th ANNUAL

ALLIANCE GRADUATE SUMMER SCHOOL

INEQUALITY AND THE ENVIRONMENT

*with applications to public policy,
social science, and natural science*

ONLINE || 12 – 14 MAY AND 19 – 20 MAY 2021 || 8AM – 2PM EST

The Alliance network and the Columbia Global Center in Santiago are pleased to announce its tenth annual summer school in sustainable development. This 5-day virtual program is geared toward graduate students in economics, environmental science, public policy, and related fields. This year's edition is focused on the intersection of the natural environment and socioeconomic inequality. Each day, the summer school will open with presentations by world-class researchers and policymakers who work on topics related to inequality and the environment; participants will then work in groups to develop a unique research proposal related to the theme. Students will also participate in practical workshops geared toward developing data analysis skills. The goal of the summer school is to bring together a diverse group of researchers for building research skills and developing connections for future research collaboration.

APPLICATIONS

- Open to research-based masters and PhD students
- Deadline: 5 April 2021
- Apply at <http://tinyurl.com/sdev2021>
